

Product Overview

Ezi Klamp Systems are pleased to introduce an alternative palisade fencing system. Our GRP pales, rails and posts are made of premium-quality glass reinforced plastic (GRP), an innovative material that has been proven to have many advantages over the traditional galvanised steel used in the standard systems. This palisade fencing system is tested to and complies with BS 1722-12:2016.

Advantages

- Tested to and complies with BS 1722-12:2016
- Corrosion & Chemical Resistant
- Non-conductive
- Lightweight
- Maintenance free
- Strong & secure
- Bespoke gates available
- Pre-site assembly service

Applications

- Railway & trackside
- Water treatment works
- Chemical works
- High voltage risk areas

Available from stock in Grey and Green
